PROFESSIONAL SUMMARY

Results-driven Computer Science student specializing in Computer Systems and Network Technology, with hands-on experience as an iOS Developer and in building web applications. Currently developing a BPO Application Portal that streamlines recruitment workflows, from applicant intake and skills assessment to AI-assisted evaluation and admin dashboards. Eager to apply technical troubleshooting, software development, and continuous learning to deliver reliable solutions and contribute to team success in a dynamic IT environment.

EDUCATION

Bachelor of Science in Computer Science

Expected Graduation: 2027

Philippine Christian University

- Dean's Lister – 1st Year to 3rd Year

CERTIFICATIONS

- TESDA NC II - Computer Systems Servicing
- Cisco - Introduction to Cybersecurity
- Fortinet Certified Associate in Cybersecurity

TECHNICAL SKILLS

Languages: Java, Swift, SQL (MS SQL Server), PHP, HTML, CSS, Swift

Mobile Development: Android Studio (Java), Xcode (Swift/SwiftUI)

Systems & Security: Active Directory (AD DS), FortiGate, network configuration and troubleshooting, hardware diagnostics and repair

Platforms: Windows Server 2019/2022, Windows 10/11, macOS, Kali Linux, VirtualBox

PROJECTS

Communix BPO Applicant Portal

In-Progress

Full-Stack Development Project

- Developed a full-stack recruitment portal for Communix, a BPO company, streamlining applicant intake, resume uploads, assessments, typing and voice evaluations, and application status tracking.

Built the applicant-facing portal and role-based HR and super-admin dashboards using Next.js, TypeScript, React, Supabase, Tailwind CSS, and OpenAI-powered voice scoring.

Github: <https://github.com/jomariiii/Communix-Applicant-Portal>

Cashtra (Swift)

Completed

Personal Project

- Developed a personal finance app for tracking income, expenses, balances, and overall budget management.
- Built with Xcode (Swift/SwiftUI) with a focus on clean UI and usability.
- Reached the Top 4 in paid finance app in App store

App Store: <https://apps.apple.com/ph/app/cashtra-finance-tracker/id6778774809>

CiviReport - Barangay Tracking System

Completed

Collaborative Project | Role: Frontend Developer

- Contributed to the frontend of a barangay reporting and tracking platform, improving interface usability and responsiveness.

GitHub: github.com/JohnCarl-30/CiviReport-FrontEnd

KEY STRENGTHS FOR IT OJT

- Technical troubleshooting and hardware/software support - TESDA NC II certified
- Network configuration, cybersecurity fundamentals - Fortinet & Cisco certified
- Strong problem-solving and organizational skills demonstrated through academic projects
- Able to communicate technical concepts clearly; committed to providing excellent user support
- Self-motivated learner with consistent Dean's List standing and active GitHub portfolio
